This is the third time I have had to leave a review for this scammer game developer.

Basically he released Bequest. It received negative reviews from a lot of people & to avoid negative reviews, he changed the name of the game but in turn, also downgraded the quality of his game... (which wasn't already good to start off with?)

2 weeks later he has since released Bequest as a DLC as it has no reviews and is starting fresh.... too bad the consumer has to purchase Last Answer before they purchase this garbage game...
