Q: Apostrophe Coding with OpenCV I'm looking for something like Ruby's apostrophe coding for OpenCV as a bonus feature. Basically, I want an apostrophe or space (' or ") in image coordinates if the character cannot be found, as it is in Ruby.

A: You can apply OR to OpenCV::cv::videostab::Ptr::k(). The idea is to represent it as a string and search for spaces. Then check if we have a match:

```
bool cv::videostab::Ptr::operatork() k(); } bool
cv::videostab::Ptr::operatork() k(); } bool cv::videostab::Ptr::operator>( const cv::videostab::Ptr& v )
const { return (this->k() > v->k()); } bool cv::videostab::Ptr::operator>=( const cv::videostab::Ptr& v
) const { return (this->k() >= v->k()); } class MSpaces { public: MSpaces(){} void append(const
char* s) { add(s); } void add(const char* s) {
```
